December 22<sup>nd</sup>, 2023

St. Francis School  
426 Osceola Ave S  
St. Paul MN 55102

Dear St. Francis School,

***Purpose of letter***

This letter is to inform you of the results of a drinking water sample collected from 426 Osceola Ave S on 12/08/2023.

- That sample was analyzed for lead. The analytical method used was EPA 200.8.
- The result of your sample is **<1 ppb**.
- This result is below the **15 ppb** action limit set by the EPA, (Environmental Protection Agency).

***What does this mean?***

Results at or below 15 ppb indicates your exposure to lead from drinking water is low.

***What you should know?***

Saint Paul Regional Water Services has an ongoing corrosion control program. There is no lead in the drinking water when it leaves the treatment plant. Most lead is picked up from service lines and interior plumbing in homes.

For additional information, the following resources may be helpful:

- For information on lead in drinking water  
<http://water.epa.gov/drink/info/lead/index.cfm>
- For information regarding exposure to lead from sources other than drinking water  
<http://water.epa.gov/drink/contaminants/basicinformation/lead.cfm>

If you have any questions, please call me at 651-440-1636 or one of the other Water Quality Specialists at 651-226-1635.

Sincerely,

Sarah Brown  
Water Quality Specialist  
Saint Paul Regional Water
